

Brief Introduction of Far East Horizon's Industrial Operation Section

In addition to financial business, Far East Horizon, with its rich experience and customer base in industries after years of industry focus, concentrates on and integrates resources in industrial operation business in several major service industries closely related to the national economy and people's livelihood: there are around 30 hospitals controlled by the Group with the number of actual beds available amounting to more than 12,000. As such, the Company has developed the leading hospital operation group in China together with its strategy of 'More Specialized Hospitals and Less General Hospitals'. As for construction engineering services, Horizon Construction Development, a comprehensive equipment service provider by the Company, has established an operation network across the country. Supplemented by the company's financial business channels such as financial leasing and public-private partnership (PPP), it has rapidly expanded the equipment service and operating lease market and established its competitive advantages in the fields of aerial work platforms, new support systems and new frames systems etc, to provide customers with multi-functional, multi-latitude and full-cycle

comprehensive services. As for elite education, Far East Horizon takes stock of the situation, seizes the opportunities brought about by the mismatch between supply and demand of China's elite education, clarifies the positioning of 'Student-Centered, Integration of East and West, Shaping the Elite', focuses on promoting elite preschool education and international high school education, and serves China's customers who are willing to receive this education and can afford it. At present, there are four international high schools and nearly ten international kindergartens under operation.
